

Consulting services and solutions for geological and geochemical challenges.

XRF-ZAP

Practical solutions for streamlined pXRF data management and processing

What XRF-ZAP offers:

EFFICIENT DATA HANDLING:

Implement procedures tailor-made to your need, including QA/QC protocols, for seamless pXRF data collection and archiving.

FIELD CREW TRAINING:

Equip your field crew with on-site pXRF data collection training sessions.

CUSTOMISED GEOCHEMICAL DOMAINING:

Utilise personalised classification systems for accurate rock composition and alteration signal analysis, enhancing mineralisation vectoring.

ON-SITE VALIDATION:

Validate classifications against geological data for enhanced accuracy.

IMMEDIATE RESULTS ACCESS:

Enable field and project geologists to swiftly access results, facilitating efficient logging and modeling.

SELECT THE BEST SOLUTIONS :

Subscription	Basic	Standard	Pro	Premium
Procedure	✓	✓	✓	✓
QA/QC	✓	✓	✓	✓
Rock classification	✗	✓	✓	✓
Alteration vectoring	✗	✗	✓	✓
3D Viewer, log and section	✗	✗	✗	✓

ADVANTAGES :

VERSATILE

Perfectly adaptable from greenfield exploration to full-scale mining projects

APPLICABLE

Covers gold, base metals, nickel, and more.

STANDARDISED

Consistent data collection and interpretation ensure uniformity across users.
